# ENGLISH CHRYSANTHEMUMS

## Field Grown Stock Plants

Growers of Greenhouse Chrysanthemums are finding that the English Chrysanthemums are just the thing to grow for early cut flowers instead of shading to produce early flowers. The owner of Angelo Greenhouses at Spokane, Washington, was here this Fall to select additional varieties for his greenhouses. He tried the English Chrysanthemums this year for the first time in his greenhouse and he is exceptionally well pleased with them.

Due to the lack of rain this Fall, the clumps do not have as many side shoots as usual. However, we do have a surplus of quite a few varieties and are offering them even more reasonable than rooted cuttings will be in the Spring. Buy these now and propagate with them this winter.

The price on any variety on this price list is 40c each or 5 of any one variety for \$1.25. PLEASE REMEMBER THAT THE 5 MUST BE ALL ONE VARIETY.
